

TECHNICAL SPECIFICATION FOR:

150KW AIR HANDLER UNIT

OVERVIEW

- ✓ High volume airflow via 2 x 800mm outlets
- ✓ Close fan speed control with fan inverter
- ✓ Robust design for industrial environments

DESCRIPTION

Celsius Hire 150KW AIR HANDLER is a powerful unit offering up to 20,000m³/hr of airflow, providing cooling or heating to large spaces. The unit requires a chilled or hot water source to its coil, and this can be achieved by coupling with a Celsius Hire Chiller or Boiler or connecting to an existing system.

With 2 x 800mm outlet spigots fitted as standard, and Celsius Hire's large range of ducting ancillaries, the unit can be applied to large scale applications such as distribution depot cooling and heating, data centres and supermarkets. Additional features include on-board inverter controlled variable fan speed, flexible connections, and a mounted 32A 3Ph 5pin commando plug.
