

TECHNICAL SPECIFICATION FOR: 7KW SPLIT AC UNIT

OVERVIEW

- ✔ Highly flexible uses with umbilical line up to 35m long
- ✔ Compact footprint of internal unit
- ✔ Runs from a standard 13A domestic socket

DESCRIPTION

The Celsius Hire 7KW SPLIT AC UNIT is a powerful unit ideal for use in data centres, offices and spot cooling in warehouses/process environments. By using water instead of air to remove heat, the unit avoids the de-rating effect of the condenser in traditional air conditioning systems, delivering up to 7.3KW of chilled air. The package comes complete with an internal portable upright AC unit, which is joined to a remote condenser located externally, all via an interconnecting water-filled umbilical line of up to 35m. This allows the units to be used deep inside buildings or in anywhere where venting hot air is an issue, as associated with mono-bloc systems.
