

TECHNICAL SPECIFICATION FOR:

550KW CHILLER

OVERVIEW

- ✔ Operates in ambient temperatures of up to +45°C
- ✔ Capacity control with 6 no. scroll compressors
- ✔ EC fans included

DESCRIPTION

Celsius Hire's 550KW chiller is an eco-design compliant model offering a large temperature range thanks to a refrigerant circuit composed of R410A and 6 no. scroll compressors. This allows capacity control for smaller and variable heat loads. The model has a compact footprint, but with its efficient design is able to operate in ambient temperatures of up to 45°C.

The unit is complete with a shell and tube evaporator, flow switch and associated safety switches. This, coupled with Celsius Hire's full supporting range of pump sets, buffer tanks, cables and hoses allows installation on a wide range of applications, from process cooling to HVAC systems.

This 'de-rate table' is a rough guide as to chiller cooling capacity at different outlet fluid temperatures allowing for quick selection on applications. It is based on a 30°C ambient temperature and glycol mix to suit outlet temperature. For accurate selection we are able to run a full selection on your application.
